

KOSISH ADHIKARI

Key skills

- Proficient in Microsoft Office Suite (Word, Excel, PowerPoint, Outlook)
- Strong organizational and time management skills.
- Basic graphic design skills (Canva, GIMP)
- Presentation design and delivery
- Problem solving
- Attention to details
- Quick learner with adaptability to new software and tools
- Team collaboration and interpersonal skills
- Basic Knowledge in Python, HTML, CSS, JavaScript and Java

Education

Bsc Hons. in Computing (Currently Pursuing)

The Westminster College

- BSc Hons in Computing and Networking

NEB +2

Global School of science

- Science (Bio with compulsory Mathematics)

SEE

Timeline School

- General Curriculum with Optional Mathematics and Computer Science

SUMMARY

Detail-oriented Computing and Networking student with a solid academic foundation in computer systems, network security, and IT principles. Passionate about technology and skilled in analyzing complex problems with a structured approach. Actively involved in Model United Nations (MUNs), demonstrating strong communication, public speaking, and leadership abilities in high-pressure, collaborative environments. Eager to combine technical expertise with interpersonal strengths in team-based projects, internships, or research opportunities.

MUN/ Event Organised

S.N	Name of MUN	Role
1	Sanskrit MUN 2024	Chief advisor
2	Inspire Diplomats Bootcamp 2024	USG of logistics
3	SC MUN 2024	USG of logistics
4	Westminster MUN 2025	Secretary General
5	Westminster Basketball Tournament	Organizer

Workshops & Training

- **Inspire Diplomats Bootcamp – by Inspire Nepal and Young Diplomats Club**

Engaged in intensive training on diplomacy, public speaking, and negotiation strategies through simulations and MUN-style activities.

- **"Launch Your IT Career – Mastering Skills for Success" – by JobAxle**

Focused on career readiness in the IT field, covering essential skills like professional communication, personal branding, CV writing, and technical soft skills.

Projects

- **Pizza GUI Application**

GitHub: <https://github.com/kosishadh/Pizza-GUI>

Developed a desktop-based pizza ordering system using Java with a graphical user interface. Implemented interactive components for menu selection, order customization, and price calculation. Focused on user-friendly design and event-driven programming concepts.

- **CSV Math Analyzer**

GitHub: <https://github.com/kosishadh/csv-math-analyzer>

Built a Python-based tool to analyze numerical data from CSV files. Performed operations such as statistical calculations, data parsing, and visualization. Strengthened skills in Python programming, data handling, and problem-solving.

- **Group Web Development Project (Ongoing)**

GitHub: <https://github.com/kosishadh/Group-Project-for-Web-Development>

Currently collaborating on a web development project as part of a team. Working with HTML, CSS, and JavaScript to design and develop a responsive web application. Focused on teamwork, version control using Git, and applying modern web development practices.

Online Course and Certification

Build a Free Website with WordPress

Coursera Project Network | Completed December 2024

- Developed a fully functional website using WordPress. Learned to customize themes, design pages, and structure content with a focus on creativity, user experience, and responsive web design. Covered core concepts in web development and visual presentation.

Get Started with Jira

Coursera Project Network | Completed November 2024

- Gained foundational knowledge of Jira as a project management tool in agile software development. Explored task tracking, scrum workflows, sprint planning, and collaboration strategies. Applied principles of software engineering, agile methodology, and operational planning.

Excel Basics for Data Analysis

IBM via Coursera

- Started foundational training in Excel focused on data analysis techniques, including spreadsheet functions, data organization, and basic visualization skills. Part of multiple professional development programs.

Hackathons Joined

- **Problem Solving International Hackathon 2026**

The Westminster College (In collaboration with University of Westminster)

Participated in an international-level hackathon focused on solving real-world problems through technology and innovation. Collaborated with peers in a high-pressure, team-based environment to develop practical solutions. Strengthened skills in problem-solving, teamwork, and rapid idea development while gaining valuable exposure to real-world challenges and interdisciplinary collaboration.

Languages

Nepali: Native Language

Hindi: Intermediate Listening, Speaking and Reading

English: Intermediate Listening, Speaking, Reading and Writing
